#### [About Company]

ELGA LabWater is the world's second-largest manufacturer of pure water and ultrapure water equipment for laboratories. The Veolia Group develops environmental businesses such as water supply business and water treatment business for business establishments around the world. Among them, ELGA LabWater, headquartered in the United Kingdom, mainly manufactures and sells pure water equipment for laboratories. We are developing PURELAB brand products for laboratories and MEDICA brand products for clinical laboratories. As a manufacturer of pure water equipment for laboratories, we were the first to introduce EDI technology and UV technology, and always provide the latest water treatment technology.

#### [Main Exhibit]

- MEDICA: Reagent water system for Auto Analyzer
- CLRW standard adaptation
  - Maintaining water quality by circulating tank water and irradiating UV
  - In an emergency, pure water can be supplied only with tap water pressure.
  - A lineup of EDI types that reduce running costs
  - PURELAB Quest: ultrapure water equipment for laboratories
  - 1.2L / min water sampling speed
  - UV type is most suitable for high-sensitivity instrumental analysis such as HPLC and genetic testing.
  - It is a very affordable price with the actual selling price in the 300,000 yen range.
- We also have a lineup of models that are ideal for life science and ultra-sensitive analysis.

#### [About Company]

Since the establishment of a business, I offer various disposable products made by plastic skillful with a physics and chemistry plane. Molding plant at the company's group has been consistently up to a molding from the mold making products that incorporate the opinions of the customer, to provide high quality products to satisfy our customers is possible. Because I produce it automatically in the molding environment for exclusive use of the physics and chemistry apparatus, and the molding factory molds it under the thorough quality control system, the management such as the traceability does not have any problem and can supply the highly precise product which is most suitable for the production such as expendable supplies for automatic share note devices.
